

Doherty and Schulz Awards

Each year the DFW-ACS section honors two outstanding members of the section. The **Doherty Award** is given for excellence in chemical research or chemistry teaching, meritorious service to ACS, establishment of a new chemical industry, solution of pollution problems, and advances in curative or preventive chemotherapy. The impact of these accomplishments may be either of local or national significance. Nominees may come from industry, academia, government, small business, etc. The nominee should be a member resident in the area served by the DFW ACS Section, and the work on which the award is based should usually have been done in this area. The honorarium for the Doherty Award is \$1500 and an engraved plaque. A large photo of the Doherty Award winner will be displayed permanently in the Gallery of Doherty Award winners, Berkner Hall, University of Texas at Dallas.

The **Schulz Award** is given to high school chemistry teachers like **Dr. Werner Schulz**, who bring something extra to the teaching of chemistry. The nominee or nominator need not be ACS members. Nominees should show excellence in chemistry teaching as demonstrated by testimonials from students and fellow teachers, results in student competitions, and diligence in updating and expanding scientific/teaching credentials. The honorarium for the Schulz Award is \$1000. A large photo of the Schulz Award winner will be displayed for one month at the Science Place 1 in Dallas, and then the photo will be displayed permanently in the Gallery of Schulz Award winners, Science Bldg., Tarleton State University in Stephenville. A traveling plaque stays at the winner's high school for the year of the award.

The two winners will normally receive their awards and give their lectures at a fall meeting of the section. The DFW section stretches from Abilene on the west to Sherman on the north to Commerce on the east to Stephenville on the southwest.
